Replace Lagrange Multiplier Method Xiong

a theoretical framework from back-propagation - we know it, although the idea of back-propagating derivatives is much older, especially for continuous time systems [athans and falb, 1966; noton, 1965]. *lecture slides on nonlinear programming based on lectures ...* - nonlinear programming min x∈x f(x), where • f: n → is a continuous (and usually differ- entiable) function of n variables • x = nor x is a subset of with a "continu- ous" character. • if x = n, the problem is called unconstrained • if f is linear and x is polyhedral, the problem is a linear programming problem. otherwise it is a nonlinear programming problem
